Subject Overview	In this subject key management technology systems, processes and software are introduced and evaluated in relation a variety of business models. Students will assess business needs and identify appropriate IT system solutions in line with performance requirements, risk profile, budget constraints (including ongoing costs) and level of customisation. Concepts such as cyber security, privacy and protection of intellectual property are discussed and incorporated in decision making processes.

Learning Outcomes	Examine current business systems to identify ICT requirements.
	Compare and contrast commercial software systems available for the management of corporate hospitality facilities.
	Evaluate quality assurance, integrity and risk issues associated with the implementation and operation of ICT.
	Communicate ICT requirements to a range of stakeholders.

Assessments	**Details**	**Weighting**
	Group presentation on a selected technology system	25%
	ICT needs analysis	20%
	ICT specification document	15%
	Business case	40%

Graduate Attributes addressed in this subject	Preparedness
	Systematic and coherent body of knowledge
	Cognitive skills to synthesise and consolidate knowledge
	Communication skills
	Personal attributes – Risk awareness
